Remarks

The phrase “beautiful inside and out” is often reserved for people, but it certainly applies to this magnificent 2023 Pulte-built Stonewater model in the prestigious community of Shoreview at Waterside in Lakewood Ranch. Inside, the home boasts 3,963 sq. ft. of exceptional living space, which includes 4 generous bedrooms and 4 full baths. The primary suite is conveniently located on the first floor and features an expanded custom closet with an abundant amount of room — perfect for even the most dedicated fashionista. Two of the additional bedrooms are also located downstairs, creating true privacy with the highly sought-after split floor plan. On the second floor, you’ll find a loft with a quartz countertop wet bar, the 4th bedroom and full bath, making it ideal for entertaining, nanny quarters, guest space, or a private retreat. The home features an open floor plan, soaring coffered ceilings, and a chef’s delight of a kitchen with a gas range and upgraded stainless steel appliances — including a Wi-Fi-enabled refrigerator with a craft ice maker. The light and bright kitchen showcases upgraded cabinetry, beautiful white quartz countertops, and a whole-home reverse osmosis water system. A butler’s pantry and an abundance of cabinet space make this home perfect for hosting and everyday living.
